

New Carbon Material Available

Dura Temp Corporation is now offering a new carbon-fiber reinforced carbon material, designated DT-10A. This is in addition to its current DT-10 carbon-fiber-carbon material.

The new DT-10A material is made from compressed sheets of woven carbon fibers and carbon, rather than the chopped fibers utilized in DT-10. This new, highly durable material is able to withstand continuous temperatures up to 1200°F (650°C).

While both DT-10 and DT-10A are primarily intended for Lehr (Stacker) Bar applications, some jobs require elevated temperatures which exceed the capabilities of the DT-10 material. For these extremely

high temperature applications, Dura Temp is now able to provide a contact material solution with the DT-10A.

In addition to Lehr Bar Triangles and custom job-specific shapes, DT-10A is also available in sheet form. For more information, please contact one of our Technical Specialists at technicalsupport@duratemp.com.

Dura Temp's new carbon fiber reinforced carbon material, DT-10A

Glass India 2006 and Glassman South America 2006

Dave Rollins, President, and Jon Horner, Senior Technical Specialist, would like to thank all those who visited Dura Temp's booth at Glass India 2006. The show proved to be very successful at the new Grand Hyatt Mumbai location. If you did not have a chance to meet with Dura Temp's representatives but would like more information about our products and ser-

vices, please visit www.duratemp.com.

The above mentioned representatives as well as Erica Wilkowski, Marketing Specialist, will also be exhibiting at Glassman South America in Brazil. Dura Temp will be co-exhibiting with Interglass S.A. de C.V., Pennine Industrial Equipment, and Lattimer Ltd. in booths 59, 60, 65 & 66.

Company & Product Updates

New Buyer for Dura Temp

Effective January 2006 Sherri Denker has been promoted to the position of Buyer/Planner for Dura Temp. She has been with the company for over three years as the Production Planner. Ms. Denker will now be in charge of purchasing, vendor relations, and production scheduling. Dura Temp is pleased to welcome Ms. Denker to her new position.

Roller Bottle Guide Updates

Dura Temp's Roller Bottle Guide is now offered with a steel bracket in place of an aluminum one. The steel bracket is stronger and more durable.

The bottle guide is also being assembled with stainless steel shoulder bolts which help prevent corrosion and tin build up.

New Product Catalog available on CD

Dura Temp's new product catalog, introduced in 2005, is now available on CD. If you would like to receive the catalog please visit www.duratemp.com and fill out the form located under the Updates link. You may also email marketing@duratemp.com to request a copy.

Dura Temp's Authorized Agents and Distributors

If your country is not listed, please contact us at our corporate office in Holland, Ohio, USA and we will be able to assist you.
