FOR IMMEDIATE RELEASE
February 15, 2010

Dura Temp appointed as global distributor for Protatherm®

Dura Temp, a leading supplier in hot ware handling solutions, is pleased to announce that it has been appointed as the global distributor for Protatherm® hot ware handling products in many markets around the world. Complimenting Dura Temp's line of hot ware handling solutions, Protatherm® will add gob funnels, gob deflector plates, mold top plates, takeout inserts, deadplates, transfer plates, and other items to the company's current line of products. The Protatherm® range of products and materials have been specifically designed to aid in the forming and handling of hot glass containers in production.

This new partnership between Dura Temp and Protatherm® offers customers one point of contact for all of their hot ware handling needs from gob deflectors through thelehr loader.

Since 1983, Dura Temp Corporation has provided the glass industry with superior hot glass handling materials and quick-change parts and assemblies, providing a variety of ware handling solutions for container glass, tableware, and bending and tempering.

Dura Temp's range of high temperature materials and products virtually eliminate damage to glass on account of thermal stress, oil absorption, and abrasion. With a combination of leading-edge materials technology and a systems approach that applies the right materials to the right applications, Dura Temp solutions are second to none.
