

DIFFICULT TO REMOVE ORIFICE RINGS?

SEFPRO'S
Anti-Stick Powder &
Sealing Cement

EASY REMOVAL OF ORIFICE RINGS

R220 - Fireclay based sealing cement. Seals the gap between orifice ring & spout.

R298 - Refractory based anti-adhesive powder. Prevents cement from sticking to the spout.

Creates an excellent seal that is easier to remove.

Fast preparation & positioning

Cost savings in labor & parts

Reduces cold glass issues

Perfect seal between spout & orifice ring

Prevents damage to spout seat

Easy & fast removal of orifice ring during job change.
